Props

The ever-popular Acrow-style Prop is a favourite in Australia's Building & Construction Industry. Props are the most economic and versatile temporary support solution, available in 5 different sizes. Props are supplied in Painted, Electroplated and Hot Dipped Galvanized. Western Scaffold stock Props to suit almost any support requirement.

Uses

- Temporary support
- Falsework support
- Holding beams and brickwork in place
- Replacing damaged permanent supports

Features & Benefits

- Constructed from Heavy Duty steel for a long life and maximum strength
- Fully Tested to Australian Standards
- 5 Versatile sizes are available (Size 0 – Size 4)
- Simple and fast to install yourself
- Available in 5 sizes ranging from 1067mm to 4876mm
- Generous height range means the Props can be used to satisfy many different jobs
- Props work hard, and can support up to 35kiloNewton (equivalent to approx. 7,860 pounds)
- Light weight for such a heavy duty product. Props weigh between 13kg and 27kg.
- Reasonably easy to transport. Size 0 to Size 2 Props can fit in a standard Utility Van, and are from 1067mm long (when closed)
- One of the most wanted construction tools on the Australian market due to it's practicality and low cost.
- Special pricing for bulk orders is available
- Custom paint colour can be arranged for bulk orders (production time applies)
